## **URJAM**

**BUILDERS' ASSOCIATION OF INDIA**  
**Kerala (Trivandrum) Centre**

If you want to understand the Universe, think in terms of energy. This quote by Nikola Tesla best expresses why we call ourselves Urjam, which is Malayalam for energy.

We do contracting Electrical, Plumbing, Firefighting, for buildings and infrastructure facilities. Today, we are one of Kerala's leading MEP firms, with few of successful projects and delighted clients across the state.

In some cases, around 40% of a building's construction budget can go into project's Mechanical (i.e. ducts, pipes, equipment, etc.), Electrical (i.e. light fixtures, data/power outlets, etc.), Plumbing and Fire Protection systems; huge monetary investment that has impact on operating cost of the building in both, shorter and longer run. Thus, to establish disciplined MEP coordination in a construction project is admirable for every sector. A well-executed MEP coordination can save you millions and maybe more importantly deliver the project faster.
